

# 5mm SPC FLOORING

# WHO WE ARE

⊗ EVO SERIES  
a next  
generation  
for flooring  
shaping up  
our smart life.

EraFlor is the premium in-house brand from L&T Marketing Sdn Bhd, a leading company in the Malaysian flooring industry with three decades of rich experience.

As a company committed to responsible business practices, EraFlor SPC flooring is trusted by homeowners and architects alike and can be found in residential and commercial spaces throughout Peninsular Malaysia.

EraFlor SPC (Stone Polymer Composite) represents a new generation in floor coverings. Engineered with smart materials to create a heavy duty core, EraFlor SPC flooring is suited for high traffic and commercial environments.

EraFlor features embossed and matt textures that realistically mimics wood and stone surfaces. Stay secured with wear resistance and a water resistant SPC core, backed with a lifetime termite resistant warranty.

## COMPONENTS

### 1 UV Coating

Enhanced durability, easy care and maintenance.

### 2 Clear Wear Layer

Transparent wear layer provides excellent resistance to stain, scuffs and abrasions.

### 3 Printed Decorative Film

High resolution printed film delivers vivid effects in realistic and natural appearance.

### 4 SPC Core

100% Termiteproof SPC core, dimensional stable, strong and durable.

### 5 Locking System

Easy Click Installation System

## WHY ERAFLOR?

**Water Resistant  
Core Materials**

**Lifetime  
Termite  
Warranty**

**Eco Friendly with  
0% Formaldehyde  
Emission**

**Flame  
Retardant**

**Wear  
Resistant**

**Stain  
Resistant**

**Easy  
to Install**

## WARRANTY

- **Lifetime** Termite Resistant Warranty
- **Up to 5 years\*** for moderate commercial application
- **Up to 10 years\*** for residential application

\*(Subject to stipulated terms & conditions.)

The subfloor surface must be clean from any debris, dry, smoothly screeded and must be even. Any uneven subfloor must undergo with the self - levelling process.

For more information such as subfloor preparation, site condition requirements, installation methods, maintenance requirements, etc., please refer to the EraFlor packaging.

## INSTALLATION INSTRUCTIONS

Prepare Floor.  
Underlay on the dry  
and leveled subfloor.

Start at a corner.  
Place first plank with  
tongue side facing wall.  
Use spacers to maintain  
an expansion space of  
8mm between wall and  
flooring

Insert 2nd plank's end  
tongue to 1st plank's end  
groove at an angle of 15°  
to 20°. The plank will  
click into place when  
lowered.  
Line up edges carefully.  
Planks should be flat to  
the floor.

For the last plank of a  
row, flip a full plank to  
its under side and place  
beside the row. Measure  
and mark the required  
length. Use a ruler and  
utility knife to score the  
plank and snap off.  
Insert as previous  
diagram.

Begin next row with the  
last cut off piece from  
the previous row to  
stagger the pattern.

To start second row,  
assemble your entire row  
on the subfloor before  
attaching it to the first row.  
To attach, tilt and push  
the side tongue into the  
side groove of the first  
row at an angle of 15° to 20°.  
Lower and click into place  
lining the edges up carefully.  
Continue laying remaining  
planks in this manner.

To fit the final row, lay a  
plank upside down on the  
flooring as per diagram  
with the tongue side close  
to wall. Take another  
plank and place it right  
on top of the previous  
row and use it as a ruler.  
Don't forget to allow room  
for spacers. Cut the plank  
and attach into position.

The gap between the  
bottom of a door and the  
vinyl flooring should be 1 cm  
height. To trim door frames,  
turn a plank upside down.  
Place it next to the door  
frame as per diagram.  
Use a handsaw and cut  
away the necessary  
height so that the planks  
can slide easily  
underneath the frame.
